Wave Product Alert

Please be advised that we have issued a safety related alert for certain models of WAVE 20/50 Series and Instruments. There are no reported incidents, so this is a precautionary alert, but one we strongly encourage you to review if you have applicable equipment (list below). While the likelihood of incident is low, we are first and foremost concerned with providing you the highest quality at all times.

Customers with equipment of the types listed below will be receiving a letter describing the issues and the immediate and planned actions. However, owners may already now inform us via waveretrofit@ge.com about the following:

1. Product type
2. Serial number/s of the product/s
3. Current location of product (country, city)
4. Operational status
5. Name, e-mail address and telephone number of contact person

Any of the listed products delivered directly from GE Healthcare after 16 June, 2008 are not affected by this alert. If the product was provided by a company other than GE Healthcare (whatever the date of delivery), including our authorized dealers, please check against the list and inform us so that we can confirm if any action is required.

	Product name
	<i>Base units and mixers</i>
1	BASE20/50EHT
2	BASE20/50EHT - 220 VOLT
3	BASE20/50EHT-L
